

§ 1.121(c). According to 37 C.F.R. § 1.121(c)(1)(ii), no marked-up version of the amended claims need be supplied.

R.1.126

~~10~~
~~1.~~

(New) A keyboard for a computer, the keyboard comprising:

a plurality of keys, each key including a key structure;

a keyboard structure holding the plurality of keys in place relative to one another

and defining a space between the key structures of at least two of the plurality of keys;

and

a computer component other than a keyboard component, the computer component being at least partly disposed in the space between the key structures.

~~11~~
~~2.~~

(New) The keyboard of claim ~~1~~¹⁰ wherein the computer component disposed between the key structures includes power means for providing power to the computer.

~~12~~
~~3.~~

(New) The keyboard of claim ~~2~~¹¹ wherein the power means comprises a power source.

~~13~~
~~4.~~

(New) The keyboard of claim ~~3~~¹¹ wherein the power means comprises power regulation means for regulating power supplied to the computer.

~~14~~
~~5.~~

(New) The keyboard of claim ~~4~~¹⁰ wherein the computer component disposed between the key structures comprises an integrated circuit.

~~15~~
~~6.~~

(New) The keyboard of claim ~~5~~¹⁰ wherein the computer component disposed between the key structures comprises a passive component.

R1.126 16 10
16 8 (New) The keyboard of claim 1 wherein the computer component disposed between the key structures comprises output means for outputting data from the computer.

17 8 16
(New) The keyboard of claim 7 wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

18 8 10
(New) The keyboard of claim 1 wherein the computer component disposed between the key structures comprises storage means for storing data.

19 10. (New) A computer system comprising:
a central processing unit;
output means for outputting data from the computer; and
a keyboard comprising:
a plurality of keys, each key including a key structure;
a keyboard structure holding the plurality of keys in place relative to one another and defining a space between the key structures of at least two of the plurality of keys; and
a computer component other than a keyboard component, the computer component being at least partly disposed in the space between the key structures.

20 11. 19 10
(New) The computer system of claim 10 wherein the computer component disposed between the key structures includes power means for providing power to the computer.

21 12. 20 11
(New) The computer system of claim 11 wherein the power means comprises a power source.

²²
~~18.~~ (New) The computer system of claim ~~11~~²⁰ wherein the power means comprises power regulation means for regulating power supplied to the computer.

²³
~~14.~~ (New) The computer system of claim ~~10~~¹⁹ wherein the computer component disposed between the key structures comprises an integrated circuit.

²⁴
~~15.~~ (New) The computer system of claim ~~10~~¹⁹ wherein the computer component disposed between the key structures comprises a passive component.

²⁵
~~16.~~ (New) The computer system of claim ~~10~~¹⁹ wherein the computer component disposed between the key structures comprises output means for outputting data from the computer.

²⁶
~~17.~~ (New) The computer system of claim ~~16~~²⁵ wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

²⁷
~~18.~~ (New) The computer system of claim ~~10~~¹⁹ wherein the computer component disposed between the key structures comprises storage means for storing data.

²⁸
~~19.~~ (New) A keyboard for a computer, the keyboard comprising:

a plurality of keys, each key of the plurality of keys having a key structure supporting a key cap, the key structures and the key caps of the plurality of keys defining a section key space;

a keyboard structure for holding the plurality of keys in place relative to one another; and

a computer component other than a keyboard component, the computer component being at least partly disposed in the section key space.

R1.126
29²⁸/₂₀. (New) The keyboard of claim ²⁸19 wherein the computer component disposed in the section key space includes power means for providing power to the computer.

30²⁹/₂₁. (New) The keyboard of claim ²⁹20 wherein the power means comprises a power source.

31²⁹/₂₂. (New) The keyboard of claim ²⁹20 wherein the power means comprises power regulation means for regulating power supplied to the computer.

32²⁸/₂₃. (New) The keyboard of claim ²⁸19 wherein the computer component disposed in the section key space comprises an integrated circuit.

33²⁸/₂₄. (New) The keyboard of claim ²⁸19 wherein the computer component disposed in the section key space comprises a passive component.

34²⁸/₂₅. (New) The keyboard of claim ²⁸19 wherein the computer component disposed in the section key space comprises output means for outputting data from the computer.

35³⁴/₂₆. (New) The keyboard of claim ³⁴25 wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

36²⁸/₂₇. (New) The keyboard of claim ²⁸19 wherein the computer component disposed in the section key space comprises storage means for storing data.

37₂₈. (New) A keyboard for a computer, the keyboard comprising:

a plurality of keys, each key including a key structure and a key cap, the key structures and the key caps of the plurality of keys defining a section undepressed key capless key space;

a keyboard structure holding the plurality of keys in place relative to one another;
and

a computer component other than a keyboard component, the computer component being at least partly disposed in the section undepressed key capless key space.

R1.126
38 ~~29~~. (New) The keyboard of claim ³⁷~~28~~ wherein the computer component disposed in the section undepressed key capless key space includes power means for providing power to the computer.

39 ~~30~~. (New) The keyboard of claim ³⁸~~29~~ wherein the power means comprises a power source.

40 ~~31~~. (New) The keyboard of claim ³⁸~~29~~ wherein the power means comprises power regulation means for regulating power supplied to the computer.

41 ~~32~~. (New) The keyboard of claim ³⁷~~28~~ wherein the computer component disposed in the section undepressed key capless key space comprises an integrated circuit.

42 ~~33~~. (New) The keyboard of claim ³⁷~~28~~ wherein the computer component disposed in the section undepressed key capless key space comprises a passive component.

R1.126

~~43~~
~~44.~~ (New) The keyboard of claim ~~28~~³⁷ wherein the computer component disposed in the section undeepressed key capless key space comprises output means for outputting data from the computer.

~~44~~
~~45.~~ (New) The keyboard of claim ~~34~~⁴³ wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

~~45~~
~~36.~~ (New) The keyboard of claim ~~28~~³⁷ wherein the computer component disposed in the section undeepressed key capless key space comprises storage means for storing data.

~~46~~
~~37.~~ (New) The keyboard of claim ~~28~~³⁷, wherein:

the key structures and the key caps of the plurality of keys also define a section undeepressed key space; and

the computer component other than a keyboard component is at least partly disposed in the section undeepressed key space.

~~47~~
~~38.~~ (New) The keyboard of claim ~~37~~⁴⁶ wherein the computer component disposed in the section undeepressed key space includes power means for providing power to the computer.

~~48~~
~~39.~~ (New) The keyboard of claim ~~37~~⁴⁶ wherein the computer component disposed in the section undeepressed key space comprises an integrated circuit.

~~49~~
~~40.~~ (New) The keyboard of claim ~~37~~⁴⁶ wherein the computer component disposed in the section undeepressed key space comprises a passive component.

R1.126

~~50~~ 41. (New) The keyboard of claim ~~37~~⁴⁶ wherein the computer component disposed in the section undepressed key space comprises output means for outputting data from the computer.

~~51~~ 42. (New) The keyboard of claim ~~41~~⁵⁰ wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

~~52~~ 43. (New) ~~B~~ The keyboard of claim ~~37~~⁴⁶ wherein the computer component disposed in the section undepressed ~~key~~ space comprises storage means for storing data.

~~53~~ 44. (New) A keyboard for a computer, the keyboard comprising:
a plurality of keys, each key including a key structure and a key cap;
a keyboard structure holding the plurality of keys in place relative to one another;
the key structures and the key caps of the plurality of keys defining a bounding key set undepressed key capless space; and
a computer component other than a keyboard component, the computer component being at least partly disposed in the bounding key set undepressed key capless space.

~~54~~ 45. (New) The keyboard of claim ~~44~~⁵³ wherein the computer component disposed in the bounding key set undepressed key capless space includes power means for providing power to the computer.

~~55~~ 46. (New) The keyboard of claim ~~45~~⁵⁴ wherein the power means comprises a power source.

R1.126

~~56~~
~~57~~. (New) The keyboard of claim ~~45~~⁵⁴ wherein the power means comprises power regulation means for regulating power supplied to the computer.

~~57~~
~~48~~. (New) The keyboard of claim ~~44~~⁵³ wherein the computer component disposed in the bounding key set undepressed key capless space comprises an integrated circuit.

~~58~~
~~49~~. (New) The keyboard of claim ~~44~~⁵³ wherein the computer component disposed in the bounding key set undepressed key capless space comprises a passive component.

~~59~~
~~50~~. (New) The keyboard of claim ~~44~~⁵³ wherein the computer component disposed in the bounding key set undepressed key capless space comprises output means for outputting data from the computer.

~~60~~
~~51~~. (New) The keyboard of claim ~~50~~⁵⁹ wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

~~61~~
~~52~~. (New) The keyboard of claim ~~44~~⁵³ wherein the computer component disposed in the bounding key set undepressed key capless space comprises storage means for storing data.

~~62~~
~~53~~. (New) The keyboard of claim ~~44~~⁵³, wherein:

the key structures and the key caps of the plurality of keys also define a bounding key set undepressed key set space; and

the computer component other than a keyboard component is at least partly disposed in the bounding key set undepressed key set space.

R1.126

~~63~~
~~54.~~ (New) The keyboard of claim ~~53~~⁶² wherein the computer component disposed in the bounding key set undepressed key set space includes power means for providing power to the computer.

~~64~~
~~55.~~ (New) The keyboard of claim ~~53~~⁶² wherein the computer component disposed in the bounding key set undepressed key set space comprises an integrated circuit.

~~65~~
~~56.~~ (New) The keyboard of claim ~~53~~⁶² wherein the computer component disposed in the bounding key set undepressed key set space comprises a passive component.

~~66~~
~~57.~~ (New) The keyboard of claim ~~53~~⁶² wherein the computer component disposed in the bounding key set undepressed key set space comprises output means for outputting data from the computer.

~~67~~
~~58.~~ (New) The keyboard of claim ~~57~~⁶⁶ wherein the output means comprises remote access means for transmitting data to or receiving data from a device that is not physically attached to the computer.

~~68~~
~~59.~~ (New) The keyboard of claim ~~53~~⁶² wherein the computer component disposed in the bounding key set undepressed key set space comprises storage means for storing data.
